About This Content

There's no business like show business! In his infinite wisdom, El Presidente has decided that our beloved island of Tropico is to be the leading cultural influence on the world stage. To do this, you will produce a blockbuster movie which outclasses every other Hollywood production in existence and sets itself up for endless reboots, sequels and director's cuts in the process.

Every movie needs a set, and for this epic production, the whole island will be prepared for a blockbusting World War II movie. In 'T-Day', you must re-enact the defending of Tropico from its biggest-ever invasion and produce the greatest movie that the world has ever seen!

- New standalone scenario: 'T-Day' – shoot the greatest movie of all time!
- New building: Fortress – every ruler needs his fortress(es)
- New dynasty avatar accessory: Great War Helmet
- New sandbox map: Becouya
- New music track and additional voice recordings

Gosh I don't remember these games to be this hard... now can never manage to get past the 2nd boss with 1 coin. Then again, Capcom arcade games are known for setting up an obnoxiously challenging boss for the 2nd stage. (surrender your coins kids!)

The interface design is neat and aesthetically pleasing. Plenty of resolution and in-game filter options to choose from under the graphics menu. I've yet to find out how to access the BIOS menu of a game to tweak things like difficulty etc.; at least it's not obvious to me. Button settings for the menu cannot be changed but it's easy to map buttons once you've loaded a specific game; on the other hand, the default buttons aren't that bad either (WSAD, JKL and whatnot... i.e. what I'm always more comfortable with). So far (fortunately) the game hasn't had any performance or stability issues on my rig. Nothing like crashing upon startup or anything mentioned in other reviews so I guess these issues are circumstantial.

Overall it's a recommended buy.

Looking forward to some remakes someday, perhaps?. I played this game for a while and... well here are the pros and cons

PROS :
Seems fun
Fun for the tutorial

Cons :
The game
. For anyone who likes adventure time show this game will be fun.. Think to Die is simple physics based game. It's free to play so besides time, there isnt much to loose in trying the game if you like the concept.

The physics are bad but still do the job if you get used to, and contrary to most games, here you have to kill your character to progress in the levels.

The game consist in kill your character by walking them into spikes or touching the top of the white box with their head, this is done by moving objects to switches, jumping off other characters or trampolines.

Im not sure if the 3D physics engine was the best choice here, since the physics dont work very well, a simple 2D engine might had done a better job, but still a very interesting concept and way to kill time and yourself playing a diferent game.
. VAC = Valve Allow Cheating. Challenges are hard. Everything else is great.. This game is a lot of fun and a great story line to it. The puzzles were a bit difficult but I tried my best to solve them. Plus I like the fact that you can skip puzzles if too difficult so I don't see why you would get frustrated. I would recomend this game to anyone. Even if they aren't a mystery fan. I wish I could get another Blue Toad game. VB. its to Hard For me. i'm not reccomended you to buy this game. PLEASE DONT

Reach for the Sun is sort of a weird little niche. It's educational and fun and at first glance would be perfect for kids. However it ends up being a bit to fast-paced for kids to keep up. For $5 it isn't a bad buy at all, but the limited content and the fact that it isn't quite kid-friendly makes it something that not everyone will enjoy. It's also frustrating to deal with the small bugs - like clicking over and over on a root or leaf and getting no response.. I bought this game around 2 days ago, with it's early access, I immediately knew that bugs, glitches and issues would be found in the game. Therefore, even though I came across some bugs, I didn't get frustrated over it since I've expected issues from an under developing game.
I was addicted to this game, maybe around 3 hours non-stop from the first day. It does seem like you're the master mind of some kind of world domination project. I had to restart the game for a few times since I'm not that kind of clever iq over 9000 nerd.
I do recommend this game to those of you who have the patience and who likes strategy games. It's worth it, trust me.. Love this game atmosphere. Remind me of The Maltese Falcon movie in 40's. Very short game, but I feel it's worth it for the good price it asks. Good weapon variety, good challenge, visuals are nice, and it offers a few variatons on the standard gradius-style gameplay. Kind of like Gigantic Army in the robo-feel you get from it, but different enough that you don't feel like they're ripping eachother off. I should also mention a feature that this game has that's so rare in video games: enemies will actually have completely different combat AI depending on difficulty. They'll sometimes use entirely new attacks. I thought that was a nice touch.. I hate Tower Defence games .....until now ! I don't know what it is about it but after checking the demo I had to go for the full game . Maybe it's the Sci-Fi setting or the great graphics and leveling up of your defence capabilities that draws me in . Getting spanked hard too but just want to "try it one more time " .. boring. I'd rather read online comics then break my mouse with the 100,000 clicks it took me to get through all the text and the limited art. No decision making just straight dialog. good thing it was dirt cheap. Story is lousy too.
